

Tambah css untuk layout

```
rebase > src > app > layout.tsx > styles > nav
30 // =====
31 const styles = {
32   body: {
33     margin: 0,
34     fontFamily: "'Segoe UI', Tahoma, Geneva, Verdana, sans-serif",
35     background: "linear-gradient(135deg, #0f172a, #020617)",
36     color: "white",
37     minHeight: "100vh",
38   },
39   nav: [
40     {
41       display: "flex",
42       justifyContent: "center",
43       gap: "24px",
44       padding: "20px",
45       background: "#020617",
46       borderBottom: "1px solid #e293b",
47       position: "sticky" as const,
48       top: 0,
49       zIndex: 100,
50     },
51     link: {
52       color: "white",
53       textDecoration: "none",
54       fontWeight: "bold",
55       transition: "color 0.2s",
56     },
57     main: {
58       padding: "40px",
59       display: "flex",
60       flexDirection: "column" as const,
61       alignItems: "center",
62       gap: "30px",
63     },
64   };
65 }
```
